BRIEF SUMMARY

As an undergrad majoring in Information Technology, I possess a solid foundation in React.js, Web Development, RESTful APIs, Redux, and other web technologies. I am dedicated to staying up to date with the latest trends and advancements in this field. I have a strong ability to collaborate with cross-functional teams and I am skilled at designing responsive web applications and implementing dynamic solutions that meet the specific needs of clients and end-users. I have experience of 6 months as a Software Developer Intern in Utilizing cutting-edge technologies such as Node.js, Express.js, and MongoDB. At another internship opportunity as a Project Manager intern, I gained knowledge about software development principles and practices. My career objective is to continuously enhance my skills and knowledge in React.js and related technologies while ensuring high-quality code and user-centric experiences. In terms of expectations for myself, I hope to deliver well-structured and maintainable code, adhering to industry standards and coding conventions. For my employer, I anticipate a supportive and conducive work environment that fosters growth, provides opportunities for learning and development, and recognizes and rewards achievements.
